National Train Day
Volunteers Needed

Close Call Reporting

Amtrak Business Lines
Train of Thought

This past March, we submitted our proposed FY 2015 budget to Congress. This year, we are requesting $1.62 billion in federal capital and operating support, an increase of approximately 16 percent over last year.

Our proposed budget redirects the operating profit obtained from the Northeast Corridor (NEC) towards the planning and implementation of major multi-year projects in the NEC such as replacing century old bridges and tunnels. NEC revenues have recently exceeded operating costs by more than $300 million a year. Many don’t realize that much of the revenue from the NEC is also used to cover some of the costs of state-supported and long-distance trains. This year’s federal request asks Congress to fully fund the operating and capital needs of the long-distance routes so that NEC revenues can be reinvested directly in our aging infrastructure—which badly needs it.

Today, the NEC is at capacity, and steadily increasing amounts of investment are needed if we are to maintain the current level of use and begin to build for the future. Investing in the NEC will benefit the entire company and, in the long run, our nation. The country simply cannot afford to let a rail line that carries half of Amtrak’s trains and 50 percent of the nation’s rail commuters fall apart.

Amtrak has been going through changes in order to grow, improve financially and become the passenger railroad that we envision in our Strategic Plan. Part of this change involves a clearer presentation of our budget and the use we make of resources, both those we receive and those we generate.

The FY 2015 budget will bring costs of our other services (long-distance and state-supported) to light through this budgeting process. Both our state services and our long-distance trains are a valuable part of our nation’s transportation system and I have every reason to believe that Congress will continue to provide the necessary funding to keep these services operating. It will be up to us then to manage them as efficiently as we can because our stakeholders, the state DOTs and Congress expect nothing less from us.

If Congress funds our request of $1.62 billion, this level of funding will allow Amtrak both to sustain our current levels of service and to make important investments in our Northeast Corridor. Providing our legislative and grant request for FY13 by business line will bring even greater transparency to Amtrak’s budget, and provide greater clarity on the specific needs of each part of our business.

As we hear more in the next few months concerning our budget request, we will communicate the next steps or any significant changes. Our request has met a largely favorable initial reception, and there is reason to hope that the improvements you’ve contributed to over the past decade are helping us to make an effective case. In the meantime, let’s continue to make Amtrak the company that takes America where it wants to go by providing superior customer service and safety.

Front Line Focus
“I would like to let you know that one of your telephone representatives, Ms. Loretta O’Bannon #6304 was outstanding in her resolving my Amtrak travel plans on Monday, March 3, 2014.

Ms. O’Bannon went over and beyond the call of duty. She was patient, listened to my concerns, sensitive to my needs and was able to successfully resolve my situation.

If there are any commendations that you give to outstanding employees, Ms. Loretta O’Bannon should be given one.

I am looking forward to my trip on Amtrak, thanks in no small part to Ms. O’Bannon.

Very truly yours,”
—Roberta Bryce

“Greetings from California:
My wife and I had the pleasure of traveling from Sacramento to Fresno on January 25 (Train 704). Although all staff members with whom we interacted were helpful, we would like to especially commend Mr. Randall Curtis.

His courtesy, helpfulness, and friendly demeanor with the passengers in our car went way beyond our expectations. He exemplifies the type of Amtrak employee that enhances the image of your operation. We sincerely wish him the best during his time with you. Amtrak could do well to hire future employees of his caliber.”
—William Stock, PhD

“I am writing as a recent customer of Amtrak’s travel service on behalf of a federal government agency and wish to pass on a word of gratitude for one of your employees, Mr. John Hamilton. On Thursday, February 20, 2014 I was traveling from Washington, D.C. to Philadelphia on Acela Train 2212, and experienced a medical problem. Mr. Hamilton was the conductor on that train and he was very helpful in his concern and care for me. This train was very busy and he had many responsibilities, but he kindly helped me recover, moved my luggage, and found me a seat on the train. Throughout my travels, he and his colleagues kept an eye on me as I recovered. It was a long and stressful day and I was happy to arrive safely at my destination. It was very reassuring to me that your employees have a watchful eye and help those who have special circumstances as they arise—even on the busiest of travel days.

I hope you can pass on my appreciation to Mr. Hamilton and his supervisor as I am very grateful for his help.”
—Gregory Downing
Treasures from Korea: Arts and Culture of the Joseon Dynasty, 1392–1910

Amtrak employees can visit the Philadelphia Museum of Art until May 26, 2014 to enjoy this exhibit and learn more about Korean art and culture. In this first full-scale survey devoted to the art of the celebrated Joseon dynasty, discover a number of designated National Treasures—many of which have never been outside of Korea—and learn about kingship and courtly life, Joseon society, ancestral rites, and the role of Confucianism and Buddhism during this extraordinary dynasty that spanned half a millennium.

Amtrak employees can book now and save $5.00 on adult general admission through May 26 (your discount will automatically appear in the shopping cart), or reference Discount Code AMTRAKSAVE5 when you visit. Visit philamuseum.org to book your visit or obtain more information.

Exhibit Train in the Southwest

Over 4,700 visitors attended two Amtrak Exhibit Train events this past March. At stops in Chandler, Ariz., and Santa Fe, N.M., visitors learned about Amtrak’s past, present and future. The Southwest stops helped garner attention for two of our long-distance service trains, the Southwest Chief and Sunset Limited.

Employees can learn about the Exhibit Train and its schedule by visiting Amtrak.com/exhibit-train.

Slavery at Jefferson’s Monticello

Amtrak employees can visit the constitution center in Philadelphia until October 19, 2014, for the exhibit about slavery at Thomas Jefferson’s Monticello. Thomas Jefferson helped create a new nation based on individual freedom and self-government—yet he remained a slaveholder throughout his life. This powerful, revealing and deeply personal exhibition follows the stories of six slave families who lived and worked at Jefferson’s plantation—the Fossett, Granger, Gillette, Hemings, Hern, and Hubbard families—and their descendants who fought for justice and helped bring to light their ancestors’ lives and values. Slavery at Jefferson’s Monticello features more than 280 artifacts that represent each family’s trade as well as personal items of Jefferson’s including a walking stick, chess set, books, scriptures, and replica of the portable desk used to draft the Declaration of Independence. Explore the story of slavery in early U.S. history while discovering the struggle and the self-determination at the heart of America’s founding. Leave being inspired to discover your own family heritage and history.

Amtrak employees must show their Amtrak employee badge at the box office to receive discounted ticket pricing or they can also enter the promo code “AMTRAK” online at constitutioncenter.org.

Exhibit Train makes a stop in Santa Fe, N.M.
The California Zephyr comes back to Denver Union Station

On February 28, Amtrak service resumed at the historic Denver Union Station.

Amtrak had been serving Denver passengers at a temporary location on 21st St. since 2011. This made way for the redevelopment of the historic building and construction of a new commuter rail station and underground bus concourse.

Renovation inside Union Station is not yet finished. Amtrak passengers access the waiting room, ticketing and baggage office by following signs to the track-side of the building. The station now features a newly constructed passenger platform under a large white canopy where passengers load and unload from Amtrak trains.

Access to the new Amtrak facility will be from the front of the building when construction is completed in July.

“We are looking forward to bringing the California Zephyr back to its historic home and for the entire project to be complete,” said Jim Brzezinski, Amtrak route director for the train.

“Amtrak passengers will see just a hint of what’s in store at this magnificent building and we hope they return when we celebrate the grand re-opening later this year.”

Amtrak served more than 108,000 Denver passengers last year. The return of Amtrak service to the station and the establishment of commuter rail by Regional Transportation District (RTD) are key elements of the creation of a bustling mixed-use, transportation-oriented hub in and around a building with a bright future and a glorious past. According to the Amtrak-sponsored GreatAmericanStations.com website, Union Station was built in 1881 at a cost of $525,000 and was partially rebuilt after a fire in 1894 destroyed the central section. A larger Beaux-Arts style central waiting room made of Colorado granite was built in 1914 as rail traffic continued to increase. The plaster arches that line the walls of the room have 2,300 carved Columbine flowers. This station will ultimately become the connection point for Amtrak, light and commuter rail, local, regional and intercity buses and other public and private transportation modes.

Empire Builder’s Schedule Change due to Congestion in the Northwest

Empire Builder trains started to operate on a modified schedule on April 15, with most of the change affecting passengers between St. Paul, Minn., and Portland, Ore., or Seattle.

The eastbound Empire Builder trains leaving Seattle (Train #8) and Portland (Train #28) had to modify their schedules and now originate three hours earlier than they did previously. The trains are combined leaving Chicago and St. Paul
(Trains #7 and #27), and are separated at Spokane, with about 90 minutes added to the current westbound schedules between St. Paul and Seattle or Portland. Schedules between St. Paul and Chicago are largely unchanged.

The schedule change was made due to track work being done by BNSF Railway to add a second track. “We are working closely with BNSF, which owns the tracks and controls the dispatching of the Empire Builder trains between St. Paul and the West Coast, in order to publish a schedule that accounts for the freight train congestion and the condition of the BNSF-owned infrastructure,” said Jim Brzezinski, the route director for the Empire Builder.

Brzezinski took the opportunity to also acknowledge the other issues that have plagued the route this past winter. “The issues we have endured; extreme cold weather, abundance of snow, excessive freight traffic, mud slides, avalanches, etc. have wreaked havoc on the Empire Builder schedule, along with our passengers and crew, but we have somehow found a way to run the operation. The main reason I believe we got through this is due to the men and women out on the front lines, and the leadership teams who make it all happen. Our passengers rely on all of us to get them from their origin to their destination in a safe manner, and it is vital to have friendly, informative, helpful and professional employees to help get them there,” said Brzezinski.

“To all the men and women out there on the front lines, and also to your leadership, I want to send out a heartfelt thank you for taking care of each other, our passengers, and for working safely. If we can get through this, we can get through anything.”

Further schedule changes could be possible in June.

#AmtrakResidency
Moving Quickly in the Social Media Realm

Amtrak recently launched the Amtrak residency program for writers. The program is designed to allow creative professionals who are passionate about train travel and writing to work on their craft in an inspiring environment. The program will offer a long-distance round trip to qualifying writers.

Among the goals of the program:

- Drive revenue by encouraging new customers to explore long-distance train travel.
- Increase social media engagement.
- Increase the overall Amtrak brand awareness for long-distance service by continuing to engage with writers, photographers and videographers, specifically as to how Amtrak inspires them.

Applications are being accepted on a rolling basis and will be reviewed by a panel. Up to 24 writers will be selected for the program through March 31, 2015. A passion for writing and desire to travel with Amtrak for inspiration are the sole criteria for selection. Both emerging and established writers will be considered.

Employees who would like to learn more about the program and its rules should visit blog.amtrak.com/amtrakresidency/.

Amtrak will celebrate the seventh annual National Train Day on May 10, 2014, and the celebration is made more special and meaningful by our employees who volunteer across the nation. Amtrak employees are encouraged to participate in local events and share with rail fans across America, Why Trains Matter.

Last year, we held 259 events in all 50 states—featuring entertainment, model train displays and train equipment displays—that gathered tens of thousands of Americans to celebrate train travel and everything that the railroad means to our country.

Thanks to more than 500 Amtrak employee volunteers, National Train Day 2013 was a rousing success. We had an estimated attendance of almost 80,000 visitors, and follow up research indicated that 92 percent of attendees said they would attend a future National Train Day celebration; 63 percent said they planned to travel more on Amtrak because of National Train Day and 73 percent said their perception of Amtrak has improved, also because of National Train Day.

The dedication of Amtrak employees and their enthusiasm are what drives the success of these events, and provides attendees across the country with memorable experiences and an appreciation for all things trains. With your help, we are confident we can surpass last year’s numbers to attract more attendees and employee volunteers just like you.

From giving equipment tours to running merchandise stores and Amtrak information booths, volunteers help keep our event on track while sharing their love of trains with their local communities. Sign up to volunteer today at trainday411.com and share why trains matter to us all.

“I look forward to this event every year,” said Denise Salazar, secretary, Los Angeles Union Station. “Last year I volunteered at LAX and people’s questions and love for trains is what made the experience unforgettable.”

We are pleased to announce that on May 3, in partnership with the station’s 75th Anniversary celebration, Amtrak will bring National Train Day activities to Los Angeles Union Station one week in advance of the official National Train Day celebrations on May 10. Larger crowds are expected due to the joint festivities, as well as Cinco de Mayo weekend, which is celebrated across Alameda Street in the Placita Olvera, the birthplace of Los Angeles.

“Our goals on National Train Day are to reinforce the value of Amtrak travel in bringing people and communities together and to remind everyone of the vital role that all trains play in our nation’s economy every day,” said Matt Hardison, chief marketing officer, who attended last year’s event in Los Angeles.

In celebration of National Train Day, Amtrak has partnered with Dovetail Games to create an exclusive offer for Amtrak employees! Starting April 1, Amtrak employees can register to receive a FREE copy of the newly released PC game, “Train Simulator 2014—Amtrak Edition” at train-simulator.com/amtrak. Dovetail Games will also give attendees at New York Penn Station the opportunity to meet Gary Dolzell, a published U.S. railroads author and co-creator of the route in “Train Simulator 2014”. Visit dovetailgames.com to learn more.

Other featured partners include Amtrak Vacations, Chuggington, Operation Lifesaver and Walthers. To learn more about these partners and how they’re helping us to celebrate National Train Day, visit nationaltrainday.com.

Visit trainday411.com today to register to volunteer and to learn more about what’s in store for 2014.

This past September, the Confidential Close Call Reporting System (C’RS) took a significant step forward by expanding the geographic coverage for Transportation and Engineering (T&E) employees from ten Amtrak yard facilities to all Amtrak owned/dispatched territory throughout the system. Although the greatest impact will be on the Northeast Corridor (NEC), the Amtrak-dispatched portion of the Michigan Line, New Orleans Union Passenger Terminal and a few other yards and tracks throughout the country will be affected as well.

The program is a Federal Railroad Administration (FRA) pilot project to improve safety practices. The initiative is a voluntary partnership among the FRA, Amtrak, Brotherhood of Locomotive Engineers and Trainmen (BLET), United Transportation Union (UTU), National Aeronautics and Space Administration Headquarters (NASA) and the U.S. Department of Transportation. The program offers a confidential system to report “close calls” or incidents that have the potential for serious safety consequences.

But how confidential is this program? “I have used the program myself. As a yard engineer a lot of things happened and I made a report,” said Locomotive Engineer Dave Wright who is part of the Peer Review Team (PRT). “I used it myself and as a peer review team member I knew that the rest of the team didn’t know that I was the one who reported it. I have seen the system work first hand. We analyze the incident itself, why it happened and can we prevent it, and not the person who reported it,” added Wright.

“This is a joint effort by labor and management. The initiative is collaborative with the unions to identify and mitigate risk. By offering a program like this, we allow people to be more forthcoming and report things that they normally wouldn’t report if they felt that there would be any disciplinary action,” said Chief Transportation Officer David Nichols.

Employees can report a close call by using a reporting system developed by NASA, the third-party organization that collects the information and keeps it anonymous. Employees reporting a close call fill out an electronic or paper form with all the information from the incident. NASA collects and obtains more information if needed in order to create a report that is sent to a Peer Review Team made up of agreement, management and FRA members who work together to analyze and recommends corrective actions.

“This is a program that enables us to be proactive where the employees can observe something and say something. They have an opportunity to sit at the rule table by bringing to our attention things that could change the rule books and operating practices and have the ability to do something about it without repercussion and without feeling ignored,” said Conductor Michael Buckley, who has been with Amtrak for nine years. “Sometimes these are situations that could be happening to any other employee across the nation. We propose a corrective action to prevent them and drive the risk away.”

Peer Review Team West accompanied by Mr. Boardman. From left to right: Greg Gomery, Dave Redding, Mike Farrell, Greg Luiz (not-shown), Darryl Morrow, David Roth, Tim Cooper, Scott Howlett, James Billings, Joe Boardman, Brian Murphy, Dave Wright, Lynn Brown, Doug Silkowski, Mike Siska, Mike Lange.
added Buckley.

According to NASA C3RS Project Manager Brian Reilly, since its expansion in September the program has been building up not just the volume of reports but also the quality. The numbers are growing and show that employees are more comfortable filing the reports. From February 2011 to September 2013, the average of reports was 12 per month, today the average is over 30 reports a month. “The trust of the program has increased,” said Reilly. “The first two years the program was restricted to the yards and the momentum was built in the yards.”

“We are finally able to get the entire story from the field,” said Senior Safety Coordinator David Redding. “The team has done rollouts by getting to the crew bases from Los Angeles all through the West. We have used crew briefings. We have had a great reaction. Some people doubted that the program would work as intended but we have gained a lot of trust.”

“The biggest hurdle has been getting our brothers and sisters to realize that this is confidential. You report something and your manager won’t know about it—who and what’s been reported,” said Wright.

“The trust that you have in the program and the trust that your fellow co-workers have in you and your reputation is what makes a difference in the program,” said Buckley.

The system is focused on one of our main corporate goals of safety and security. The information gathered from the close call reports will make the work environment safer for Amtrak employees and our customers. “This program is important because a safety culture that encourages transparency and collaboration is so critical,” said Director of Safety Keith Wiertz.

The information that employees provide will enable Amtrak to identify factors that contribute to accidents or injuries and to correct them before they result in harm. “When we work on our day-to-day activities, we get so complacent in doing things and we don’t pay close attention until something happens,” said Locomotive Engineer Lorna Stevens. “When you report a close call, you might be saving someone’s life. We are not looking to place blame. We are looking to make Amtrak a safer place to work.”

The program also contributes to improved productivity through reduced time lost from injuries, and a decrease in damage to railroad property. “The objective is to be proactive in resolving incidents,” said Michael Buckley. “We don’t know what is going on out there. We want our co-workers to tell them what is going on since they are the ones who are working and seeing the problems. Here is their opportunity to contribute to the solutions,” said Buckley. “We are making the railroad a safer place to work and changing the culture. For the longest time if you did something wrong then you would be in trouble, now we are asking people to do a report on close calls to prevent accidents,” said Wright.

---

Two ways to report a Confidential Close Call:

1. Electronically:
   NASA’s Electronic Report Submission (ERS) website: go to http://c3rs.arc.nasa.gov/report/electronic.html

2. Via U.S. Mail:
   Go to our Employee Intranet Homepage>SAFETY>C3RS and print the form and mail it to:
   NASA Confidential Close Call Reporting System
   Post Office Box 177
   Moffett Field, CA 94035-0177

Additionally, forms should be available in your respective crew bases.

If you have suggestions, questions or comments, please send an email to:
StayingSafe@amtrak.com

---

Amtrak Chefs Get Their Creative Juices Going at Test Kitchen

For the past eight years, Amtrak’s Culinary Advisory Team (ACAT) has been conducting Food and Beverage sponsored ideation workshops which aim to develop potential new menu offerings for long-distance Dining car needs as well as for Acela First Class service. The food-centric ACAT team is comprised of Amtrak chefs, vendor-partner chefs and well-regarded restaurateurs, each of whom plays roles over the two-day workshop. The event culminated in a final menu presentation where each team member presented specific dishes which are targeted to Amtrak on-board needs and designed to work within the scope of commissary operations and train services, while also meet exacting supply chain parameters unique to Amtrak business models.

The late March 2014 event was hosted by Amtrak contract service provider Aramark at their Ideation Center in downtown Philadelphia. The dishes created covered a wide array of development guidelines including visual appeal, flavor, nutritional value, ingredient sourcing, packaging, portion, market appeal, cost, on-board execution requirements, shelf-life and potential for driving sales. Both the Acela and long-distance development teams presented many viable menu concepts as noted by Amtrak Chief of Customer Service Tom Hall. “The most important thing is not just the menu items created, but the knowledge that is built as a result of the workshop. The team seizes this opportunity to explore creating top selling menu options which maximize contribution margin which can foster potential for impacting Amtrak’s bottom-line.” Amtrak Long-Distance Services Executive Chef Daniel Malzhan underscored that thought. “The workshop represents a wonderful opportunity for the entire team to learn from one another and to collectively use its expertise to impact Amtrak passengers while showcasing its passion for creating a memorable travel experience that is financially viable for the changing needs of our business.” Tom Douglas, an award winning chef, cookbook author and Seattle-based restaurateur—has been an ACAT member since 2008. “Amtrak chefs are eager to see what is going on in the industry—they are interested in staying abreast of dining trends and knowing what is relevant in the marketplace. This workshop is a valuable tool for them to use in their ongoing effort to supply a superior product within the context of their travel environment—I really enjoy contributing to their success.”

While many of the dishes created at ACAT 2014 were enjoyed at a post-presentation luncheon tasting attended by specially invited Amtrak leaders and managers, the ‘best of the best’ have been documented and cataloged for future reference, relevance and potential development. Those dishes will be put under the ‘culinary microscope’ at Amtrak’s Wilmington, Del., test kitchen facility by Amtrak’s culinarians and Food and Beverage managers to determine potential menu application for on-board use. As there have been many dishes from previous years’ workshops which have made the final cut, odds are good that some from this year’s event are likely to also find their way to an Amtrak Dining car menu.
Celebrating our Green Values During Earth Day

This Earth Day, Amtrak has much to celebrate on the sustainability front. In July 2013, the Executive Committee signed the company’s first Sustainability Policy. For Amtrak, corporate sustainability means operating in a way that creates long-term value by balancing the needs of the organization with the needs of future generations through consideration of environmental, economic and social factors.

Several external sustainability commitments preceded the approved policy. Amtrak was a charter member of the Chicago Climate Exchange (CCX) and succeeded in exceeding our locomotive fuel reduction target. Subsequent to signing on with CCX, Amtrak joined The Climate Registry and committed to produce an annual comprehensive greenhouse gas (GHG) inventory for all operations. Amtrak also signed onto the American Public Transportation Association Sustainability Commitment, and in 2013, achieved the bronze recognition level by completing a sustainability inventory, implementing green initiatives (such as installing energy efficient lighting) and setting goals for reducing fuel use in locomotives and electricity at facilities. This past year, Amtrak began reporting our GHG inventory to the Carbon Disclosure Project (CDP), along with reporting on climate initiatives.

As part of Amtrak’s energy reduction efforts, the Utilities Management group performed 15 energy reviews and developed Energy Plans for each of the top 15 sites (highest energy usage). Amtrak had a corporate goal to reduce energy usage by one percent beginning in FY11. Using our baseline data from FY11:

- Amtrak facilities have reduced our usage by two percent and more than 18M kWh of electricity at the largest 15 sites, and
- energy reduction efforts have saved more than $4 million.

The Sanford Auto Train Maintenance Facility received the first annual Operations Department Energy Efficiency Award by reducing their usage compared to FY12 by almost 15 percent.

Amtrak Transportation and Mechanical employees have been focused on reducing fossil fuel consumption. Fuel conservation is accomplished in a number of ways including the following:

- Shutting down locomotives when they are out of service for an hour or more and the temperature is above 40°F.
- Use of 480V ground power by ‘plugging in’ trains at layover locations and in maintenance facilities while trains are being serviced.
- Improved train handling techniques to reduce energy consumption, promoted in Engineer training and re-certification classes.

Conservation of fuel through the methods noted above have the added benefit of reducing diesel related emissions and saving the company money.

Amtrak has also increased its recycling capabilities and currently, passengers can find permanent recycling receptacles in all Café and Lounge cars, on Acela First Class and Café cars, the Auto Train, and some California routes, as well as in most stations. Two years ago, the industrial design group within Rolling Stock Engineering developed prototype recycling containers for Amfleet II and Superliner equipment. During 2014, the Beech Grove Shops will be fabricating and installing permanent recycling containers on Superliner I coaches based on the prototype.

Amtrak is receiving the benefit of a Diesel Emissions Reduction Act (DERA) grant awarded through Environmental Protection Agency’s National Clean Diesel Funding Assistance Program to replace the existing diesel engines in two switcher locomotives with GenSet engines for use at our Washington, D.C., (Ivy City) yard. Amtrak is working in partnership with the Metropolitan Washington Council of Governments and the Brotherhood of Locomotive Engineers and Trainmen on this effort. The new engines will require less fuel and produce significantly less air emissions. We will celebrate this accomplishment during an event at Washington Union Station during the Earth Day celebrations on April 22. Amtrak employees will also have an opportunity to attend an informational event at Philadelphia 30th Street Station for its fourth consecutive year.

In Amtrak
History
APRIL 28, 1971

Roger Lewis was named Amtrak’s first president. Lewis served as the Amtrak president from 1971 to 1975. Before joining Amtrak, Lewis served as assistant secretary of the Air Force, executive vice president for administration at Pan American Airlines and chairman of General Dynamics Corporation. He was awarded the Medal of Freedom by President Eisenhower for his contributions to the military aircraft and ballistic missile programs.

From left to right: U.S. Secretary of Transportation John Volpe, President Roger Lewis and Board of Incorporation Chairman David W. Kendall.
